The Implant Pathway

Hands-on surgical & restorative courses

Manchester	Friday 19th November 2010
Birmingham	Friday 10th December 2010
Leeds	Friday 21st January 2011
Edinburgh	Friday 25th February 2011

On this day-course you will

- Be introduced to contemporary implant practice
- Learn Hot Tips to improve your implant practice
- Find the value in a range of well-designed implants
- Discover the benefit of using compatible implants
- Discover your best alternative to the main brands Nobel Replace, AstraTech & Straumann
- Move your implant practice forwards
- Find out how to offer implants to your patients
- Start using marketing ideas which work

d2d Implants is a new company selling compatible implants into the UK. You no longer need to have endless screwdrivers & multiple kits. You no longer have to pay the high prices for the main brands.

Start saving up to 50% immediately – switch to compatible implants now! Our implants are compatible with Straumann® Dental Implant System, Astra Tech Implant System™ and Brånemark System®”

Benefit from the connection of experienced implantologist Dr Willie Jack. 18 years experience working with implants in private practice, with Oasis & JD Hull and mentoring many dentists starting out with implants in their own practices.

The Implant Pathway

Aims and objectives

Each day-long course will introduce clinicians to contemporary implantology and provide surgical & restorative knowledge which will give the dentist a greater understanding of implant dentistry as an option available to their patients.

The course will arm the dentist with knowledge to start providing great implant care for their patients: initially restorative care can be provided where it is jointly planned with a dentist experienced in surgical implantology.

The course should be seen as part of a continuum of continuing professional development consistent with the GDC guidelines for implant training which includes mentoring.

Registration and fees

This one-day hands-on surgical & restorative implant course will cost £195 + vat (2010 courses vat is 17.5% = £229.13 and 2011 courses vat is 20% = £234.00).

Tea & Coffee from 8:30am
Course starts at 9:00am
Lunch included in cost
Course will finish by 4:30pm

Full details & directions will be sent with your booking confirmation.

The first course was run in Solihull with Emma Mullally on September 24th & 25th and October 15th. Fees: £150 per day or £400 for all three days.
Further course dates will be announced in due course.

The implantologist

Willie Jack, BDS, DGDP, MGDS, MMedSci
Clinical Director, d2d Implants Ltd.

Willie qualified in Edinburgh in 1983 and started working with implants 8 years later. In general practice his whole career, he initially worked with Brånemark System® but later changed to placing AstraTech® & Straumann® implants, lecturing widely for these companies. Today his implant practice is based in Ludlow in Shropshire & Berriew in Mid-Wales.

He is a member of the ADI, BSP & EAO and many will have met him in other roles in dentistry, such as through Denplan, Dencare, Oasis, JD Hull and at many postgrad meetings especially in Wales & the West Midlands where he was PG tutor for 4 years.

Willie had been looking for a quality alternative to the main brands that were effective, compatible, simpler and offered better value for money. Meeting with euroteknika in 2008 was a turning point and Willie has been placing & restoring their implants since the end of that year. Now he wants you to be able to share in that success story.
